Leonardo Matteo Bolognese

leonardo.bolognese@epfl.ch | github.com/utopy77 | linkedin.com/in/leonardo-matteo-bolognese/

EPFL Data Science MSc student with solid foundation in statistics, machine learning and signal processing, plus embedded experience in award winning projects.

Education

EPFL *Sep 2026 - Present*
MSc | *Data Science* *Lausanne, CH*

EPFL *Sep 2023 - Jul 2026*
BSc | *Communication Systems* *Lausanne, CH*

Liceo Scientifico Galileo Galilei *Sep 2018 - Jul 2023*
Diploma | *Opzione Scienze Applicate* *Erba (CO), IT*

Projects

Micromouse project

- Built from scratch a micromouse capable of exploring and solving a maze as fast as possible
- Worked on the maze solving algorithms and optimization, PID implementation and tuning

CanSat competition IT/EU

- With a group of 5, built a mini satellite (can-sized), launched to 1 km altitude, capable of measuring the presence of volatile organic compounds (VOCs) with ppb sensitivity
- Won the 2023 Italian competition (link here) and participated in the European competition in Granada
- Worked on the flight software that was able show real time data coming from the satellite and on the website

Stargazer (with a PoliMi association)

- With a group of 5, designed a probe to take photo of the milky way with an aerostatic balloon
- Worked on the stabilization of the probe with PID and centering of the image
- Successfully launched the probe in July 2026, now working on a new iteration

Experience

Software Developer *Mar 2024 - Sep 2025*
Agon Partners *Remote, Part-time*

- Web Scraping (BeautifulSoup/Selenium) and parsing data to feed predictive model

Software Developer *Jun 2023 - Sep 2023*
Involve Space *Erba (CO), IT*

- Data analysis of aerostatic balloon operations

Communication & Sponsoring *Sep 2023 - Jun 2025*
EPFL Spacecraft Team *Lausanne, CH*

- Contacted companies and organized events to get funding

Awards

Italian CanSat 2023 winner

Italian U16 chess champion

Italian U14 chess vice-champion

ESA AstroPi project finalist (document here)

Skills

Expertise: Machine Learning & Statistics, Algorithms & Data Structures, Cryptography & Security, Signal Processing, Embedded Systems, Dynamic Programming, Digital Communications, Computer Networks, Data-intensive systems
Languages: Python, C/C++, Scala, SQL, Java, Verilog
